OKI® Executive Series CCS: Tabloid-size (11" x 17") permanent color copies and fast network printing—right in your workspace.

Your business thrives on color—and large, impactful color documents are part of your daily communications. Think about how many presentations, ad layouts, enlargements of photos and illustrations, information-packed spreadsheets, signs and posters you design. Not to mention the countless letter- and legal-size pages with color in them. Now figure how much all that color copying is costing you...

You need an affordable in-house color copy system to increase your productivity—and lower your expenses. In other words, you need an OKI® Executive Series 3037 Family Wide-Format Color Copy System (CCS). Rather than run to the corporate or neighborhood copy center every time you need tabloid-size color copies (or postcard-size or any size in between), simply make your copies on your own convenient, professional-quality machine!

Walk-up copying and network printing.

Set up your ES 3037 Family CCS on its custom cabinet/stand and experience copy-center performance, even with limited space.

Use the system as a walk-up color or mono copier (no PC required). Both models produce up to 99 copies of an original page.

Or enhance the productivity of your workgroup or department by using either model as a fast network printer. They come factory-configured with the OkiLAN 6200e+ 10/100 Base-T Ethernet internal print server, so they're right at home in the most popular shared environments.

Print out full-color documents from files, directly from your PC or via the network (both models can print on sheets as large as 12.9" x 47.24"). Scan hard-copy documents or artwork and save them as electronic files on your PC. Or send a fax from your desktop using the Scan-to-PC function and Unimessage™ Pro software.

OKI Executive Series Color Copy Systems also support optional Job Accounting software that allows you to get a precise count of color and mono pages, as well as copies versus prints.
